

# Insignificant Activities used for Agriculture

(For operations located in the San Luis Obispo County Air Pollution Control District)

**1. List of Insignificant Activities** - Insignificant activities are defined as those that do require a permit under the District's permit exemption Rule 201 (copy available at [www.arb.ca.gov/drdb/drdb.htm](http://www.arb.ca.gov/drdb/drdb.htm) or from the District). Those emission units that are insignificant due to their emission rate, size, or production rate need to be included in a Title V permit application. Detailed information about each piece of equipment need not be included. With the exception of the first item (Rule 201.A.1 - emitting less than two pounds per day) simply check the activity as described in the table below as being used in the agricultural operation. For equipment exempt under Rule 201.A.1, provide a short description of each process (for example, miscellaneous sand blasting).

Rule 201 Section	Exempt Equipment	Check If Applicable
A.1	uncontrolled emissions of two pound per day (lb/day) or less	
	Describe	
	Each	
	Process	
B.1	internal combustion engines rated at 50 brake horsepower (bhp) or less - aggregated by process	
B.2	combustion equipment rated at less than two million British thermal units per hour (mmBtuh) - aggregated by process	
B.3	standby electrical power engines operated less than 100 hours per year	
E.1	cooling towers with a circulation rate of less than 10,000 gallons per minute	
F.1	printing equipment using no more than two gallons per day (gpd)	
G.2	bakery ovens producing less than 1,000 lb of baked goods/day	
G.4	smokehouses less than 20 sqft in size	
H.1	foam, fiberglass, or plastics operations using less than five gpd	
I.1	unheated organic liquid containers of 250 gallons capacity or less	
I.4	unheated underground storage containers of 6077 gallon capacity or less that store organic liquids with a vapor pressure of 1.5 psi or less	
J.2	unheated non-conveyorized cleaning equipment: a. with a surface area of 10.8 ft <sup>2</sup> or less, internal volume of 92.5 gallons or less, and using organic liquids with a boiling point of 302°F or more; or	
	b. emitting less than 25 gallons per year or less	
J.3	surface coating using one gpd or less	
M.1	comfort air conditioning systems with 50 lb or less of refrigerant	
M.2	refrigeration units with 50 lb or less of refrigerant
